

## **New Schedule Master mobile app for iOS and Android**

If you are using an iPhone or Android to schedule a new app is available for your phone. It does not have the full functionality of the website but is useful for checking and updating your schedule on your phone.

You can get to the app by downloading from the image in the header of Schedule Master. In the top right corner, you will see one or both of these images, depending on which device you are on.

### ***The app has the following functions:***

#### Scheduling

- all scheduling functions, including dispatcher mode.
- resource status (press the ID from the schedule)
- user status (e.g. dates, checkouts, currency, recent hours)

#### Maintenance

- ability to add/update/view squawks
- view scheduled maintenance and squawks

#### Messages - view only
